

# Working with (com)Passion!

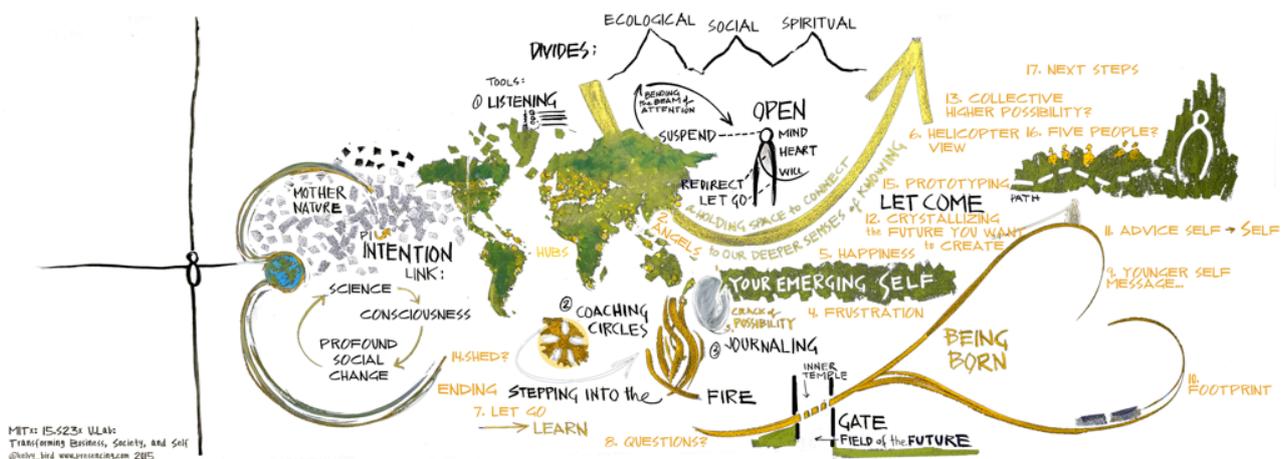

On Energy, Economy, Ecology..., & Consciousness

Workshop with Christer Söderberg  
Mallorca, Spain, or wherever you are

## Exploring facts and working with passion

Whereas today's challenges are global, solutions are local, and largely personal. Solutions based on facts and informed choices, and reflection. In this workshop we work to define our passion, and to live with compassion – for ourselves, in our relationships, and with our environment. We also look at underlying causes of the different “divides” between Society, that’s you and me, and our Energy, Economy, and Ecology, and the personal and collective choices that have gotten us here. Moving from the fragmented, disconnected reality of our world, we can re-connect and discover a more inclusive way, identifying blind spots and bridging divides with a more open world-view.

Together we explore the possibilities and opportunities of a sustainable, resilient, and self-sufficient world, helping you and/or your company transition to a safe and secure business and lifestyle, without risking the environment we depend on for our life support systems.

The dialogues and thinking processes will be facilitated by Christer Söderberg, sustainable leadership consultant and coach, offering a variety of tools and methodologies including: Coaching Leadership, Dialogue Interviews, Guided Journaling, Contemplative Practice, Formal Axiology, Theory U, and Open Space.

**Christer Söderberg** is comfortable with change. Living in nine countries, speaking seven languages, and managing companies on four continents is all about dealing with change, and adapting. Christer left corporate leadership in 2002 after establishing a Swedish industrial product multinational with an office in Brazil and distribution in six South- and Central American countries. Experiencing global economical, energy and environmental challenges first-hand prompted Christer to choose a path of self-development and working towards a more balanced lifestyle, in harmony with the planet. Based on the island of Mallorca, in Spain, in 2013 Christer initiated Sacred Valley Dialogues, a yearly conference bringing together thought leaders for dialogues on Energy, Economy, Ecology and Consciousness.
